HOW TO READ FACTSHEET

Groww MUTUAL FUND

Fund Manager

An employee of the asset management company investment manager to a mutual fund, who manages investments of the scheme. He/She is usually part of a larger investment team.

Application Amount for Fresh Subscription

This is the minimum investment amount that a new investor shall invest in a mutual fund scheme.

Minimum Additional Amount

This is the minimum investment amount for an existing investment from an investor in the mutual fund scheme.

Yield to Maturity

The Yield to Maturity or the YTM is the rate of return anticipated on a bond if held until maturity. YTM is expressed as an annual rate. The YTM factors in the bond's current market price, par value, coupon interest rate and time to maturity.

SIP

SIP or Systematic Investment Plan works on the principle of making periodic investments of a fixed sum in the scheme. For instance, an investor may opt for SIP that invests ₹500 every 15th of the month in an equity fund for a period of three years or such amount as mentioned in the application form by the investor .

NAV

The NAV or the Net Asset Value is the total asset value per unit of the mutual fund scheme after deducting all related and permissible expenses. The NAV is calculated at the end of every business day. It is the value at which the investor enters or exits the mutual fund scheme.

Benchmark

A group of securities, usually a market index, whose performance is used as a standard or benchmark to measure investment performance of a scheme under a mutual funds, among other investments. Some typical benchmarks include the Nifty, Sensex, BSE200, BSE500, 10-Year Gsec. Further, the benchmark against whose performance of the scheme is shall be mentioned and in line with the benchmark adopted by mutual fund and mentioned in 'SID' Scheme Information Document.

Exit Load

Exit load is charged at the time an investor redeems the units of a scheme. The exit load is deducted from the prevailing NAV at the time of redemption. For instance, if the NAV is ₹100 and the exit load is 1%, the redemption price would be ₹ 99 Per Unit. Please refer the SID to know in detail about the exit load.

Modified Duration

Modified duration is the price sensitivity and the percentage change in price for a unit change in yield

Standard Deviation

Standard deviation is a statistical measure of the range of an investment's performance. When a mutual fund has a high standard deviation, its means its range of performance is wide, implying greater volatility.

R Square

The R-squared figure demonstrates how much of a fund's movements can be explained by the movements in its benchmark index. The higher the R-squared figure, the more closely the fund's performance can be explained by its index, whereas a fund with a lower R-squared doesn't behave much like its index.

Beta

Beta is a measure of an investment's volatility vis-à-vis the market. Beta of less than 1 means that the security will be less volatile than the market. A beta of greater than 1 implies that the security's price will be more volatile than the market.

AUM

AUM or Assets Under Management refers to the recent / updated cumulative market value of investments managed by a mutual fund or any investment firm.

Macaulay duration

Macaulay duration is defined as the weighted average time to full recovery of principal and interest payments of a bond i.e. the weighted average maturity of cash flows. The weight of each cash flow is determined by dividing the present value of the cash flow by the price of the bond.

Holdings

The holdings or the portfolio is a mutual fund's latest or updated reported statement of investments/securities. These are usually displayed in terms of percentage to net assets or the rupee value or both in line with SEBI Circulars/Regulation. The objective is to give investors an idea of where their money is being invested by the fund manager.

Nature of Scheme

The investment objective and underlying investments determine the nature of the mutual fund scheme. For instance, a mutual fund that aims at generating capital appreciation by investing in stock markets is an equity fund or growth fund. Likewise, a scheme of a mutual fund that aims at capital preservation by investing in debt markets is a debt fund or income fund. Each of these categories may have sub-categories and in line with SEBI Categorization Circular.

Rating Profile

Mutual funds invest in securities after evaluating their creditworthiness as disclosed by the ratings. A depiction of the mutual fund in various investments based on their ratings becomes the rating profile of the fund. Typically, this is a feature of debt funds.

Macro-economic Development:

1. Volatility in commodities

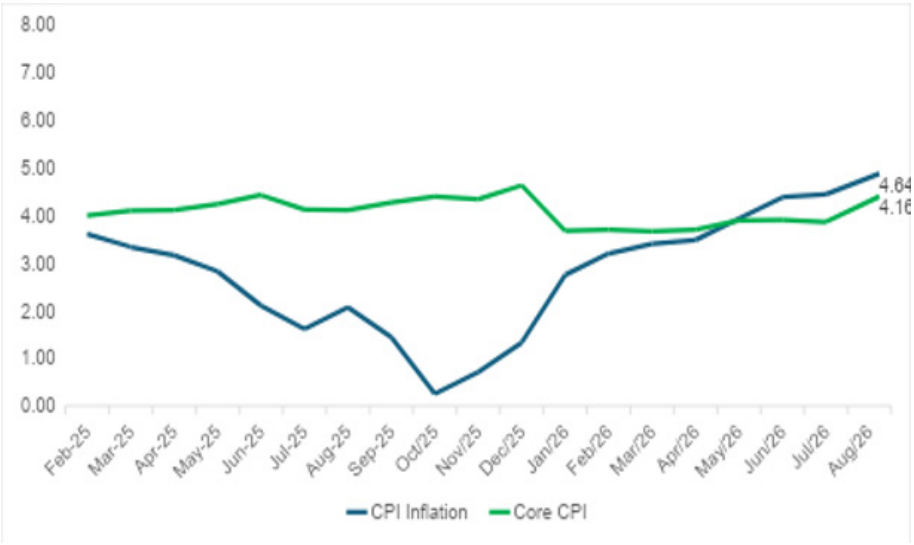

- Geopolitical tensions over the West Asia crisis intensified in recent days thus driving oil prices to rise above USD 90/ barrel.
- Brief periods of volatility due to developments in the Middle East. Given US and Iran have hardened their stance, negotiations may not proceed smoothly thus keeping oil prices elevated
- Gold prices corrected in September as Fed expectations turned hawkish.

Source: Bloomberg, as on 30 September 2026
Past performance may or may not be sustained in future and is not a guarantee of any future returns.

2. Inflation uptick during the month of July

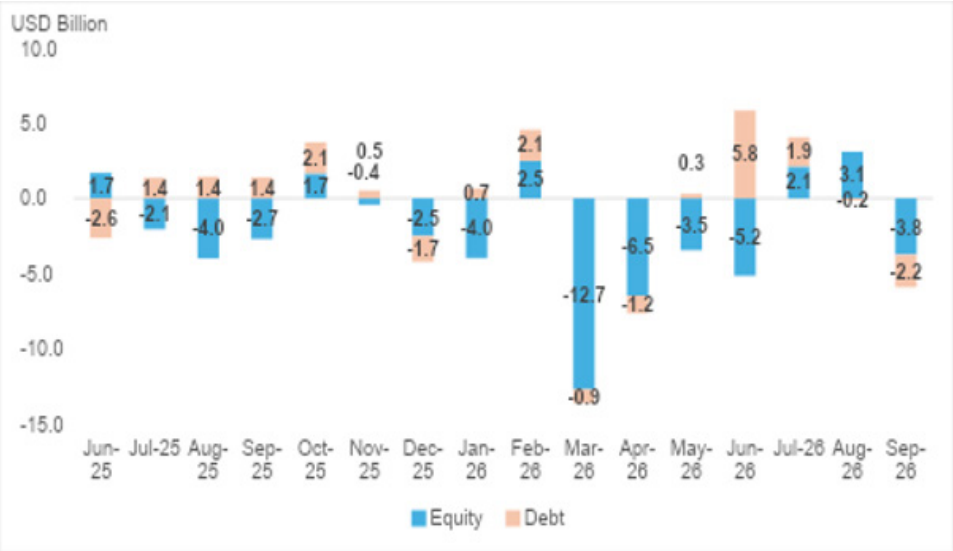

- CPI inflation moved higher to 4.82% YoY in Aug, compared with 4.44% in Jul, driven by higher food (6.0% YoY), core (4.2% YoY) and energy (5.2% YoY) inflation
- Food inflation is witnessing a broad-based increase led by sugar, veggies, pulses, cereals, and spices given deficient rainfall (-15% of LPA) and lower sowing along with higher global food prices
- Core inflation (ex-gold and silver) is increasing sequentially at a much faster pace led by pass-through of higher commodity prices into electronics, automobiles, mobile handsets (including tariffs), along with restaurants and passenger fares
- Higher oil prices along with deficient rainfall implies headline inflation in the year should be around 5% as against 4.8% earlier with next year's inflation seen around 4.6% with core (ex. gold, silver) also moving closer to target of 4% from December onwards

Past performance may or may not be sustained in future and is not a guarantee of any future returns.

3. FPI flows

- **Debt:** FPIs recorded net outflows of US$2.2 billion in September 2026.
- **Equity:** FPIs recorded net outflows of US$3.8 billion in September 2026.

Groww MUTUAL FUND

DEBT MARKET OUTLOOK

1. RBI starts liquidity withdrawal ahead of Policy

- RBI announces actions against excess liquidity seen in the month of august, due to FCNR(B) flows.
- Longer dated VRRR were conducted on September 07, 2026 and September 11, 2026.
- The Reserve Bank decided to conduct OMO sale auctions of Government of India securities for an aggregate amount of ₹1,00,000 crore in three tranches of ₹50,000 crore, ₹25,000 crore, and ₹25,000 crore to be held on September 17, 2026, September 21, 2026, and September 28, 2026, respectively.

Source: RBI press release, as on 30 September 2026

2. RBI releases Central borrowing calendar

- Gross G-sec borrowing in H2FY27 stands at INR 7.86tn, taking the borrowing for the full year to ~INR 16tn, in-line with the budget estimate after considering switch auctions with RBI
- Tenor-wise, the share of borrowing has declined for the 10-year, 5-year and 40-year tenors, while the share increased in the 15-year, 7-year and 50-year tenors

Source: RBI press release, as on 30 September 2026

3. Fed Hike

- The FOMC raised the fed funds target range by 25bps to 3.75%-4.00% in a unanimous decision given inflation has remained elevated and backdrop shows upside risks building up
- The Dot Plot has turned hawkish with median policy rate revised to 4.1% in 2026 (3.8% earlier) and 4.1% in 2027 (3.6% earlier) with 16 members seeing at least one more (25bps) hike in 2026
- Both growth and labour market outlook has strengthened with GDP revised higher and unemployment rate revised lower. Inflation (PCE and core PCE) forecasts were revised up
- Fed Chair stressed that inflation has not moderated towards 2% objective at a sufficient pace, and financial conditions have not been restrictive, thus some accommodation has been reduced

Source: Bloomberg, as on 30 September 2026

4. Putting it together. Our Fund House View

- The global backdrop is tightening -recent hikes from the Fed, BoJ, ECB and Bank Indonesia.
- Against that, sharp reversal of yield was seen during the month of September, erasing the rally which was seen due to June measures.
- Due to significant response to FCNR(B), money market rates have rallied significantly. However, reacting to Fed Hike and higher crude prices rest of the curve saw sell off.
- As highlighted in the earlier communication, we were tracking two main risks 1. Duration risk due to reversal/reduction of flows/liquidity withdrawal and 2. Brent moving above $90 3. Rise in Global Yields . Since the both the events happened during the month, we have trimmed our duration in Short term, Gilt fund and Dynamic fund during the month.
- Positioning across the schemes is calibrated to that asymmetry.

Global Central Bank Interest Rates

Previous Policy	Upcoming Policy	Country	Particulars	Current	Previous
Aug'26	Oct'26	India	RBI Repo Rate	5.25	5.25
Sep'26	Oct'26	Euro Zone	ECB Interest Rate Decision	2.65	2.40
Sep'26	Oct'26	China	PBoC Interest Rate	3.00	3.00
Sep'26	Oct'26	Japan	BoJ Interest Rate Decision	1.25	1.00

Scheme-wise Commentary by Fund Managers – Active Fixed Income Funds

Scheme	Portfolio Positioning
Groww Liquid Fund	The scheme continues to focus on enhancing accruals while maintaining a low-to-moderate risk profile, investing in high-quality, short-residual-maturity instruments (T-bills, CDs, CPs and TREPS).
Groww Money Market Fund	The one-minute story: Policy measures to attract foreign debt inflows (removal of FPI tax on G-secs, FAR expansion) have driven the rally; Early closure of FCNR(B) window and Hawkish minutes from RBI has reversed the rally in belly to longer duration securities; Alongside, progress on the US–Iran peace talks has derailed, crude has reacted accordingly; FCNR(B) has been favourable for banks and should, in turn, translate into lower Certificate of Deposit (CD) supply. How the fund is positioned: Overweight A1+ securities for better carry; Cash bucket deployed in TREPS and other short-term instruments. Key risks we are watching: An inflation surprise from food prices and energy prices; Flow-reversal risk: the front-end rally is FPI-flow-driven, and a reversal of tax-arbitrage inflows could lift short-tenor yields.
Groww Short Term Fund	The one-minute story: Policy measures to attract foreign debt inflows (removal of FPI tax on G-secs, FAR expansion) have driven the rally; Early closure of FCNR(B) window and Hawkish minutes from RBI has reversed the rally in belly to longer duration securities; Alongside, progress on the US–Iran peace talks has derailed, crude has reacted accordingly; FCNR(B) has been favourable for banks and should, in turn, translate into lower Certificate of Deposit (CD) supply; Accordingly, we have reduced duration, with expectation of tightening in policy rate by the MPC. How the fund is positioned: underweight government securities; AAA corporate bonds and A1+ securities for better carry; Minimal cash bucket, deployed in TREPS and other instruments. Key risks we are watching: An inflation surprise from food prices and energy prices; Flow-reversal risk: the front-end rally is FPI-flow-driven, and a reversal of tax-arbitrage inflows could lift short-tenor yields; Fiscal and supply concerns; Oil: India is energy-deficient, so a sustained move back above US$80/bbl on Brent would be comfortable from inflation view and could prompt us to add duration.
Groww Gilt Fund	The one-minute story: Policy measures to attract foreign debt inflows (removal of FPI tax on G-secs, FAR expansion) have driven the rally; the curve is lower by ~25–30 bps; Supply is higher in the longer end bucket of the curve in H2FY2027; Alongside progress on the US–Iran peace talks, crude has reacted accordingly; With the ultra-long end attractive on a favourable term premium, we have increased exposure there - recognising it may lag the belly if the curve bull-steepens, as we expect elsewhere on the curve. How the fund is positioned: Overweight G-secs greater than 30 years for term premium; Minimal cash bucket, deployed in TREPS and other instruments. Key risks we are watching: An inflation surprise from food prices and energy prices; Flow-reversal risk: the front-end rally is FPI-flow-driven, and a reversal of tax-arbitrage inflows could lift short-tenor yields; Long-end supply - central G-Sec and SDL issuance at the long end can widen term premia; Oil: India is energy-deficient, so a sustained move back above US$80/bbl on Brent would be comfortable from inflation view and could prompt us to add duration.
Groww Dynamic Term Fund	The one-minute story: Policy measures to attract foreign debt inflows (removal of FPI tax on G-secs, FAR expansion) have driven the rally; the curve is lower by ~25–30 bps; Supply is higher in the longer end bucket of the curve in H2FY2027; Alongside progress on the US–Iran peace talks, crude has reacted accordingly; Accordingly, we have added duration, favouring the belly of the curve in anticipation of a bull-steepening. How the fund is positioned: Overweight government securities; AAA corporate bonds and A1+ securities for better carry; Minimal cash bucket, deployed in TREPS and other instruments. Key risks we are watching: Mark-to-market / duration risk if the flow-driven rally reverses; Fiscal and supply concerns at the long end of the curve; Oil: India is energy-deficient, so a sustained move back above US$80/bbl on Brent would be comfortable from inflation view and could prompt us to add duration.

Groww MUTUAL FUND

EQUITY MARKET OUTLOOK

Demand trends in India continue to remain healthy across key sectors such as financials, autos, pharma and industrials. Moreover, investment spending on manufacturing, power transmission & distribution, data centres and select infrastructure sectors remains robust. However, the key near-term risk is profitability rather than growth as raw material, energy and shipping costs are rising, and companies can pass on these higher costs to their customers only with a lag. Global oil inventories are near the bottom of their 10-year range, leaving little cushion against supply shocks. Over the medium term, prolonged high oil prices, a weaker rupee, a poor monsoon and high global interest rates could hurt demand sentiment. Geopolitics led oil price fluctuations and rising bond yields remain the key global factors to watch.

Even so, Indian corporate now have strong balance sheets with low debt levels, which should provide stability through this volatility. Credit growth, auto sales and tax collections, which are ahead of target in the first five months of FY27, all point to underlying strength. After the recent market correction, valuations look reasonable and domestic investor flows remain strong. Foreign investors turned sellers again in September, and a sustained return will need earnings upgrades as well broad macro stability. Markets may stay volatile in the near term, but strong balance sheets, improving earnings and reasonable valuations have historically rewarded patient investors.

Global Markets

Over the past one-month, Indian equities underperformed most major global markets, with the MSCI India Index declining 6%. This move mirrored other similar emerging markets such as Indonesia, Mexico and South Africa which fell 7%-8% each. On the other hand, US indices were mixed, with the S&P 500 unchanged and NASDAQ Composite rising 2%, while the Dow Jones declined 4%. Within Asia, Taiwan was the strongest performer, rising 4%, followed by Japan at 1%, whereas China and Hong Kong declined 5% and 4%, respectively.

Currency and commodity return

Over the past one month, currency and commodity markets have shown mixed movements. In commodities, crude oil was the major mover, surging 14%, while base metals were mixed, with copper rising 1% and aluminium and zinc declining 2% and 1%, respectively. Precious metals weakened, with gold declining 6% and silver registering a sharper 9% decline over the one-month period.

The rupee weakened about 8% over the year to around 96 per dollar, near its May peak of about 97, pressured by high crude and FII outflows.

Market Outlook

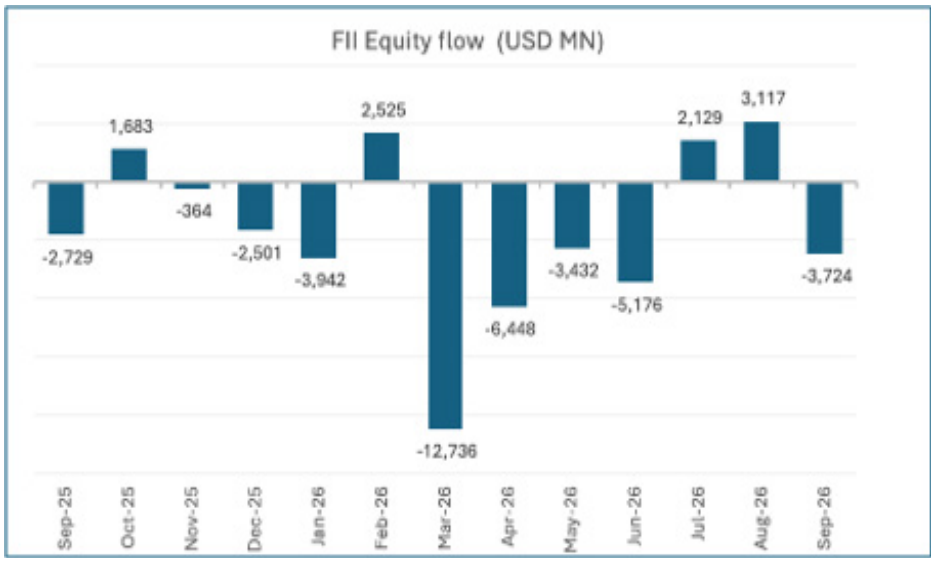

Indian Market

Over the past one-month, Indian equities remained weak across the board, with Nifty 100 and the Nifty Midcap 150 declining 6% and 7% respectively. However, Nifty Smallcap 250 outperformed broader markets. Sectoral performance was mixed, with CPSE, FMCG, Pharma and Energy falling 2-3% each. In contrast, IT was the weakest performer, declining 11%, followed by Auto at 9% and and PSU Bank at 7% each.

EARNINGS OUTLOOK

Q2FY27 is expected to be the quarter when margin impact will be visible in sectors such as consumer staples, cement, autos and capital goods. On the other hand, Financials and IT are largely insulated from raw-material costs. For banks, key tailwinds in our view are FCNR(B) deposit inflows which should drive robust credit growth. Similarly, for most large NBFCs growth should be strong as well but increasing funding costs are the key risk. IT is in for another soft quarter: large cap growth will be muted vs. mid-tier names.

Scheme-wise Commentary by Fund Managers – Active Equity and Hybrid Funds

Scheme	Portfolio Positioning
Groww Multicap Fund	Our investment strategy follows a top-down approach for large caps and a bottom-up approach for mid and small caps, focusing on companies with strong growth potential, quality management, and sound financials. Overweight sectors – Finance: The financial sector outlook remains constructive, supported by reasonable valuations, stable asset quality and strong growth across segments of credit, retail health and term insurance, digital transactions and select capital market plays. NBFCs are relatively better positioned in medium term with higher growth and stable asset quality; select opportunities in small and midcap financials appear attractive from a growth adjusted valuation perspective. Auto: Remain constructive on premium consumption and EV(2W) in OEMs while in auto-components selectively focussed on emission compliance, light weighting and exports. Post GST rate cuts, auto demand momentum remains strong but with a large base coming into play, 2HFY27 growth is likely to moderate. Capital goods: Selective exposure through themes with strong government capex outlay, i.e Power T&D, renewable energy; also exposure via EPC businesses with demonstrated record of strong NWC management and strong order books. Renewable energy, power T&D and Defence have retained momentum but roads, water and railways have seen moderation. In chemicals, exposure is focused on specialty and fine chemicals, including fluorine chemistry, refrigeration gases, oleo-chemicals, and contract manufacturing, supported by favourable pricing, improving spreads, and long-term growth visibility.
Groww Small Cap Fund	The portfolio follows a bottom-up investment approach, focusing on identifying high-quality businesses with scalable growth potential, strong management, sound financials, and attractive valuations, while maintaining a selective bias towards sectors with favourable long-term growth prospects. Overweight sectors – Finance: The financial sector outlook remains constructive, supported by reasonable valuations, stable asset quality and strong growth across segments of credit, retail health and term insurance, digital transactions and select capital market plays. NBFCs are relatively better positioned in medium term with higher growth and stable asset quality; select opportunities in small and midcap financials appear attractive from a growth adjusted valuation perspective. Bank: The outlook for banks is stable, with earnings expected to improve gradually as NIMs improve. Private banks and midcap banks are relatively well positioned from NII and earnings growth. Asset quality continued to improve, with corporate and secured retail slippages remaining low and stress moderating in unsecured retail. Auto: Remain constructive on premium consumption and EV(2W) in OEMs while in auto-components selectively focussed on emission compliance, light weighting and exports. Post GST rate cuts, auto demand momentum remains strong but with a large base coming into play, 2HFY27 growth is likely to moderate. Capital goods: Selective exposure through themes with strong government capex outlay, i.e Power T&D, renewable energy; also exposure via EPC businesses with demonstrated record of strong NWC management and strong order books. Renewable energy, power T&D and Defence have retained momentum but roads, water and railways have seen moderation.
Groww Value Fund	The scheme follows a bottom-up stock selection approach, focusing on companies with visible potential for value unlocking through rerating opportunities and better-than-expected earnings growth, while emphasizing strong fundamentals, capable management, and long-term value creation. Overweight sectors – Bank: The outlook for banks is stable, with earnings expected to improve gradually as NIMs improve. Private banks and midcap banks are relatively well positioned from NII and earnings growth. Asset quality continued to improve, with corporate and secured retail slippages remaining low and stress moderating in unsecured retail. Telecom: We remain positive on the sector as ARPUs improve driven by a duopolistic market structure and up trading, accompanied by higher conversion of profits to free cash flows driven by moderating capex. Infra: Selective exposure through themes with strong government capex outlay, i.e Power T&D, renewable energy; also exposure via EPC businesses with demonstrated record of strong NWC management and strong order books. Renewable energy, power T&D and Defence have retained momentum but roads, water and railways have seen moderation. Consumer durable: 1QFY27 has seen growth recovering, driven by price hikes and increase in sales volumes. Most companies have managed to hold gross margins despite input cost inflation; most have taken price increase of 10-15% to offset input cost increase. In FMCG, the portfolio remains selective, focusing on companies benefiting from improving volume growth, resilient demand and favourable input-cost trends, while monitoring evolving consumption patterns and competitive intensity. In healthcare, the portfolio remains selectively positive on reasonably valued pharmaceutical, hospital, diagnostic, medical equipment, and contract manufacturing companies, supported by healthy domestic demand, currency tailwinds, and improving operating leverage.

Scheme-wise Commentary by Fund Managers – Active Equity and Hybrid Funds

Scheme	Portfolio Positioning
Groww Large Cap Fund	The investment philosophy follows a top-down approach, starting with sector and industry selection, followed by identifying companies with strong financials, capable management, and reasonable valuations. Overweight sectors – Auto: Remain constructive on premium consumption and EV(2W) in OEMs while in auto-components selectively focussed on emission compliance, light weighting and exports. Post GST rate cuts, auto demand momentum remains strong but with a large base coming into play, 2HFY27 growth is likely to moderate. Finance: The financial sector outlook remains constructive, supported by reasonable valuations, stable asset quality and strong growth across segments of credit, retail health and term insurance, digital transactions and select capital market plays. NBFCs are relatively better positioned in medium term with higher growth and stable asset quality; select opportunities in small and midcap financials appear attractive from a growth adjusted valuation perspective. Infra: Selective exposure through themes with strong government capex outlay, i.e Power T&D, renewable energy; also exposure via EPC businesses with demonstrated record of strong NWC management and strong order books. Renewable energy, power T&D and Defence have retained momentum but roads, water and railways have seen moderation. Consumer durable: 1QFY27 has seen growth recovering, driven by price hikes and increase in sales volumes. Most companies have managed to hold gross margins despite input cost inflation; most have taken price increase of 10-15% to offset input cost increase. Retailing: Most retail companies continue to deliver double digit growth with improving SSG. We selectively participate in retail & staples in segments with healthy volume growth, while continuing to monitor evolving risks. Insurance: Growth in the sector has been muted for last couple of months with short revival in Aug-26, and the IRDAI consultation paper on commission caps has caused concerns on growth. In medium term, reforms can increase elasticity of products and volumes may see positive impact. Key monitorable would be final draft of the IRDAI regulation on commission caps. In healthcare, the portfolio remains selectively positive on reasonably valued pharmaceutical, hospital, diagnostic, and contract manufacturing companies, supported by healthy domestic demand, currency tailwinds, and improving operating leverage. In telecom, the sector outlook remains positive, supported by improving ARPUs, a favourable duopolistic market structure, and stronger free cash flow generation driven by moderating capital expenditure.
Groww Banking and Financial Services Fund	Within financials, the outlook remains constructive, supported by improving asset quality, easing borrowing costs, and gradual recovery in bank earnings as NIMs improve. PSU and midcap banks appear relatively better positioned, while large private banks may see slower loan growth. NBFCs, especially those with a higher share of fixed-rate assets, may benefit from lower borrowing costs. The portfolio remains selectively positioned in smaller and mid-sized financial companies where valuations appear relatively attractive. Exposure to insurance has been moderated given relatively elevated valuations, while capital market-linked businesses are being approached selectively amid the ongoing consolidation phase.
Groww Multi Asset Allocation Fund	The fund continues to follow a disciplined, rules-based investment approach guided by SHAASTRA – Strategic Holistic Asset Allocation and Systematic Technical Risk Assessment, which dynamically evaluates risk-reward across asset classes using macroeconomic, valuation, and technical indicators. During the month, global markets were shaped by a more hawkish turn in US monetary policy and elevated crude oil prices. The US Federal Reserve unanimously raised the federal funds target range by 25 basis points to 3.75%–4.00%, with its projections indicating scope for a further increase before year-end. US long-term bond yields moved close to multi-year highs and the US dollar strengthened. Brent crude remained above USD 100 per barrel amid continued disruption in the Strait of Hormuz. In India, the RBI's policy repo rate stood at 5.25% with a neutral stance, while CPI inflation for August rose to 4.82%, above the 4% target but within the tolerance band. Foreign portfolio investors turned net sellers of Indian equities after two months of inflows, and domestic equity markets remained under pressure. As of the reporting date, the fund had an allocation of approximately 60% to equities, lower by around 1.3% compared with the previous month, reflecting a calibrated stance amid heightened global rate and crude oil uncertainty. The debt portion stood approximately at 10%, enhancing income generation and portfolio balance. Arbitrage stood at approximately 4%, taking combined debt and arbitrage exposure to around 14%. Gold and silver ETFs together accounted for approximately 13.5% of the portfolio, with gold at around 12% and silver at around 1.4%, broadly steady compared with the previous month. A small allocation to REITs of around 0.7% was maintained, providing incremental diversification through real asset exposure. Overall, the portfolio remains positioned as a diversified multi-asset solution, with equity participation complemented by allocations to debt, arbitrage, precious metals, and REITs. The fund continues to make gradual asset allocation adjustments guided by SHAASTRA in a structured and objective manner.
Groww Aggressive Hybrid Fund	The fund continues to be managed using a disciplined, rules-based investment framework, which guides asset allocation and sector positioning in a structured and objective manner. The framework combines quantitative signals, fundamental inputs, and risk controls to determine equity exposure, debt allocation, and sector weights across market conditions. As of the reporting date, the fund's equity allocation stood at approximately 70%, lower by around 2.5% compared with the previous month. The balance of around 30% was held in debt and related instruments, providing income generation, liquidity, and diversification. The equity portfolio remains diversified across sectors, with the largest allocation to Financial Services at approximately 26%, followed by Healthcare, Fast Moving Consumer Goods, Automobile & Auto Components, and Metals & Mining, each in the range of approximately 4.5–5%. Other meaningful allocations include Information Technology at around 4%, and Oil, Gas & Consumable Fuels, Consumer Services, and Telecommunication at around 3% each. During the month, the most notable reductions were in Financial Services, which declined by around 2.3 percentage points, and Automobile & Auto Components, which reduced by around 1.1 percentage points. Other sector allocations remained broadly steady, with only marginal adjustments. Overall, the fund remains positioned with a measured allocation to equities, complemented by debt exposure, with the rules-based framework continuing to guide incremental adjustments in line with evolving market conditions.

Scheme-wise Commentary by Fund Managers – Active Equity and Hybrid Funds

Groww Multi Asset OMNI FoF	The fund continues to follow a diversified fund-of-funds approach, allocating across equity-oriented schemes, debt funds, and commodity ETFs to provide balanced multi-asset exposure across market conditions. As of the reporting date, the portfolio had approximately 78% allocation to equity-oriented funds and ETFs, broadly steady compared with the previous month. Large-cap strategies account for around 28% of the portfolio, supported by large & midcap exposure of around 13%, midcap exposure of around 10%, and smallcap exposure of around 6%. The portfolio also holds a contra strategy of around 10%, along with smaller allocations to momentum, consumption, and capital markets themes of around 2%, 4%, and 4% respectively. Exposure to gold and silver ETFs stood at approximately 10.5%, with gold ETFs at around 5.9% and silver ETFs at around 4.7%, broadly unchanged from the previous month. Allocation to debt-oriented funds stood at approximately 11%, across dynamic bond and credit risk strategies, providing income generation and portfolio balance. Overall, the portfolio remains positioned as a diversified multi-asset fund-of-funds solution, with predominant exposure to equity-oriented strategies complemented by debt funds and precious metal ETFs. The fund continues to make calibrated adjustments across underlying schemes in line with evolving market conditions.
Groww ELSS Tax Saver Fund	The fund continues to follow a disciplined, rules-based investment approach that integrates fundamental analysis with technical risk assessment to guide sector and stock selection in a structured and objective manner. Meaningful changes in the sector allocations were as follows – Financial Services was reduced by around 2.5 percentage points to approximately 30%, taking the allocation below its benchmark weight. Healthcare increased by around 2 percentage points to approximately 9%, Power by around 1.9 percentage points to approximately 3.3%, bringing it in line with the benchmark, Capital Goods by around 1.5 percentage points to approximately 5.4%, and Consumer Services by around 1 percentage point to approximately 4.6%. These changes reflect bottom-up stock selection and evolving risk-reward across sectors. As of the reporting date, the portfolio is overweight in Healthcare and Consumer Services, with a marginal overweight in Automobile & Auto Components. The fund is underweight in Financial Services, Oil, Gas & Consumable Fuels, Information Technology, and Capital Goods, although the underweight in Capital Goods narrowed during the month. Exposure to the remaining sectors, including Metals & Mining, Telecommunication, Fast Moving Consumer Goods, Construction, Consumer Durables, Construction Materials, Chemicals, Services, and Realty, remained broadly in line with benchmark weights. Overall, the portfolio remains diversified across sectors with a focus on quality businesses, valuation discipline, and long-term compounding, while incorporating calibrated sector positioning in line with evolving market conditions.

GROWW Banking & Financial Services Fund

(An open ended equity scheme investing in banking and financial services related sectors)

Groww MUTUAL FUND

September 2026

INVESTMENT OBJECTIVE: The primary investment objective of the scheme is to generate consistent long-term returns by investing in equity and equity-related instruments of banking and financial services companies and other related sectors/companies. The fund aims to capitalize on the growth opportunities and growth potential of various subsectors within the BFSI sector, including (but not limited to) banks, NBFCs, insurance companies, asset management companies, capital market participants, fintech players etc. (This includes companies benefiting from or contributing to the growth of the banking and financial services sector). However, there is no assurance or guarantee that the investment objective of the Scheme will be achieved. The Scheme does not assure or guarantee any returns.

GROWW Arbitrage Fund

(An open ended scheme investing in arbitrage opportunities. No investment in InvITs is permitted)

Groww MUTUAL FUND

September 2026

INVESTMENT OBJECTIVE: The primary investment objective of the scheme is to generate long term growth of capital by predominantly investing in arbitrage opportunities present between the cash and derivative markets, as well as within the derivative segment, complemented by investments in debt securities and money market instruments. However, there can be no assurance that the investment objective of the scheme will be realized.

GROWW Short Term Fund

(An open ended short term debt scheme investing in instruments such that the Macaulay duration of the portfolio is between 1 year to 3 years)

Groww MUTUAL FUND

September 2026

INVESTMENT OBJECTIVE: The Scheme will endeavor to generate stable returns over short term with a low risk strategy while maintaining liquidity through a portfolio comprising debt and money market instruments such that the Macaulay duration of the portfolio is between 1 year – 3 years. However, there can be no assurance that the investment objective of the scheme will be achieved.

NA - Not Applicable. Returns above are Compounded Annualised Growth Returns (CAGR). Past performance may or may not be sustained in future and its not a guarantee of any future returns. All returns are for Growth Option only.

Note: schemes not compplete6 months with Note: Since the scheme has not completed 6 months and hence absolute returns have been provided. The “since inception” returns are calculated on Rs 10/- invested at inception. For this purpose, inception date is deemed to be the date of allotment. The “returns” shown above are for the growth option. Past performance may or may not be sustained in future and should not be used as a basis for comparison with other investments.

Note : Mr. Anupam Tiwari manages 5 schemes, Mr. Saptarshee Chatterjee manages 5 schemes, Mr. Aakash Chauhan manages 41 schemes, Mr. Nikhil Satam manages 49 schemes, Mr. Shashi Kumar manages 43 schemes, Mr. Kaustubh Sule manages 9 schemes, Mr. Paras Matalia manages 5 schemes, Mr. Wilfred Gonsalves manages 13 schemes, Mr. Ameya Sakpal manages 6 schemes, Mr. Hitesh Das[1] manages 5 schemes.

[1]Mr. Hitesh Das has been appointed as Fund Manager (Equity) with effect from September 30, 2026.

GROWW SIP PERFORMANCE

Groww MUTUAL FUND

September 2026

Systematic Investment Plan (SIP) returns are worked out assuming investment of Rs. 10,000/- every month at NAV per unit of the scheme as on the first working day for the respective time periods. The loads have not been taken into account. Past performance may or may not be sustained in future and its not a guarantee of any future returns.. Returns are for Growth option only. CAGR returns are computed after accounting for the cash flow by using XIRR method (investment internal rate of return).

GROWW SIP PERFORMANCE

Groww MUTUAL FUND

September 2026

Systematic Investment Plan (SIP) returns are worked out assuming investment of Rs. 10,000/- every month at NAV per unit of the scheme as on the first working day for the respective time periods. The loads have not been taken into account. Past performance may or may not be sustained in future and its not a guarantee of any future returns.. Returns are for Growth option only. CAGR returns are computed after accounting for the cash flow by using XIRR method (investment internal rate of return).
