Investment Strategy	Under normal market conditions, the Scheme would invest predominantly in a diversified portfolio constituting equity and equity related instruments entities that the Fund Manager believes have sustainable business models, and potential for capital appreciation. The corpus of the Scheme will be invested predominantly in large cap stocks and/ or in exchange traded derivatives on the S&P CNX Nifty Index or su Large cap stocks. 0-20% of the net assets will be invested in securities other than large caps. A very small portion of the fund will be kept liquid. T Scheme may also use various derivatives and hedging products from time to time, as would be available and permitted by SEBI, in an attempt to prot the value of the portfolio and enhance Unitholders' interest. Large Cap entities shall consist of investment universe which are within 1st-100th company terms of full market capitalization. The scheme shall adopt the list of stocks prepared by AMFI based on SEBI defined parameters. AMFI is mandated update such list once in 6 months. The scheme shall rebalance the portfolio (if required) in line with updated list, within a period of one month. The investment environment, valuation parameters and other investment criteria will determine the allocation and the investment style. The Fund Manag would follow a top down approach to shortlist stocks for portfolio construction. Under the top down process the Fund Manager would look at the glob and Indian economy and the domestic policy environment and stock valuations. This would result in identification of themes which have a potential outperform. The final stock selection process would be a bottoms-up process wherein stocks from the short listed themes would be picked up based valuations. Under normal market conditions and depending on the Fund Manager's views, the assets of the Scheme would be invested across stocks that represen broad range of sectors of the economy in order to ensure adequate portfolio diversification. **Corporate Action / Event Driven Strategies** **a. IDCW Arbitrage** At the time of declaration of IDCW, the stock futures / options market can provide a profitable opportunity. Generally, the stock prices decline by the I amount when the stock becomes ex-IDCW. **b. Buy-Back / Open Offer Arbitrage** When the Company announces the buy-back or open offer of its own shares, there could be opportunities due to price differential in buyback price and t price. **c. Merger** When the Company announces any merger, amalgamation, hive off, de-merger, etc, there could be opportunities due to price differential in the cash a derivative market. **Derivative Strategies** A derivative is a financial instrument whose value depends on other, more basic, underlying variables likes stock or commodity, any kind of economical i A derivative is essentially a contract whose payoff depends on the behavior of some benchmark. The derivatives shall be marked-to-market by the Inves Manager at all times. Transactions in derivatives include a wide range of instruments, including, but not limited to futures, options, swaps, and interes swaps, forward rate agreements and any other instrument as may be permitted by SEBI/RBI from time to time. Derivatives may be used for hedging and portfolio balancing purposes or such other purpose as may be permitted by SEBI/RBI from time to time, to s optimise performance in the Scheme and will be subject to applicable Regulations of SEBI/RBI from time to time. Trading is permitted only in exch

traded derivatives. Derivative markets in India are now fairly liquid with daily average volumes to the tune of Rs. 90000 – 100000 crore as compared t market volumes of Rs. 10000- 15000 crore.

Futures

Futures are contracts to buy or sell an asset on or before a future date at a price specified today. Futures can be cash settled or delivery settled. Current transaction is netted at the end of the contract and the difference settled between the investor & the clearing house. Payoffs in futures are linear with refe to the underlying and the risk is basically directional. Buyers and sellers of futures carry equal risk.

In India, three futures of 1 month, 2 months, and 3 months are presently traded on BSE & NSE. These futures expire on the last working Thursday respective months. The futures are cash settled and there is no delivery of the underlying stock. The Profitability of the Index / Stock Future as compa underlying individual securities / security will inter-alia depend on

- Carrying Cost
- Interest accrued on surplus funds
- Transaction Costs
- Cost associated with rolling over of the futures trade, if applicable
- Liquidity in the markets etc

Index Futures

Stock index futures are instruments designed to give exposure to the equity markets indices. The Stock Exchange, Mumbai (BSE) and The National Exchange (NSE) have trading in index futures of 1, 2 and 3 month maturities. The pricing of an index future is the function of the underlying index, shor interest rates and market expectations. Index futures are cash settled, there is no delivery of the underlying stocks.

If a Scheme buys 100 futures contracts, each contract value is 50 times the futures index price. On purchase date, Spot index: 5400, Future price: 5425. exchange imposes a margin of 10%, the Investment Manager will be required to provide Rs.2,712,500 (i.e. 10% * 5425* 100 * 50) by way of eligible sec and/or and cash. The balance 90% can be parked in cash equivalents. If on the date of expiry - the S&P CNX Nifty Index closes at 5525, the net impa be a profit of Rs. 500,000 for the Scheme ((5525–5425) * 100 * 50) plus the interest earned on the 90%deployed in cash equivalents. The profit or loss f Scheme will be the difference between the closing price (which can be higher or lower than the purchase price) and the purchase price.

Strategies that employ index futures and their objectives:
(a) The fund has an existing equity portion invested in a basket of stocks. In case the fund manager has a view that the equity markets are headed downv the fund can then hedge the exposure to equity either fully or partially by initiating short positions in the Index futures.

(b) A similar position in the long direction can also be initiated by the fund to hedge its position of cash and permissible equivalents. Considering that Deri market is more liquid than Cash market, fund manager can also use it to take exposure to equities and then build the cash market positions over time.

The extent to which this can be done is determined by guidelines issued by SEBI from time to time.

Risk associated with this strategy:
1. Lack of opportunities available in the market
2. Inability of the derivatives to correlate perfectly with underlying indices
3. Execution risk, whereby the rates seen on the screen may not be the rates at which the ultimate execution takes place.

Stock Futures

A futures contract on a stock gives its owner the right and obligation to buy or sell stocks. Single stock futures traded on the BSE & NSE are cash s there is no delivery of the underlying stocks on the expiration date. A purchase or sale of futures on a security gives the trader essentially the same exposure as a purchase or sale of the security itself.

The Scheme buys shares of XYZ Ltd. Its current price is Rs. 1000. The Scheme sells one month futures on the shares of XYZ Ltd at Rs 1050. If the pr the stock declines, the Mutual Fund will suffer losses on the stock position held and profit on futures position. The price of stock on the expiry date is R The price of the futures on the stock declines to Rs 950. There is a loss of Rs. 50 per share on the on the holding of the stock. This is offset by profit of R on the short position in stock futures. Basically, Fund locks in a profit of Rs. 50, if both the positions are held till expiry.

Strategies that employ Stock specific futures and their objectives:
Individual stock futures are also available in the Indian Equity Markets. Stock futures trade either at a premium or at discount to the spot prices; the le premium generally reflects the cost of carry. Stock specific issues may have a bearing on futures as speculators may find futures as a cost-effective w executing their view on the stock. However such executions usually increase the premium/discount to the spot significantly, thereby giving rise to arb opportunities for a fund.

(a) Selling spot and buying future :

In case the fund holds the stock of a company at say Rs. 500 while in the futures market it trades at a discount to the spot price say at Rs. 480 then the may sell the stock and buy the futures. On the date of expiry of the stock future, the fund may reverse the transactions (i.e. Buying at Spot & Selling fu and earn a risk-free Rs.20/- (4% absolute) on its holdings. As this can be without any dilution of the view of the fund on the underlying stock the fund ca benefit from any movement of the price in the northward direction, i.e. if on the date of expiry of the futures, if the stock trades at Rs. 530 which would price of the futures too, the fund will have a benefit of Rs. 30 /- whereby the fund gets the 6% upside movement together with the 4% benefit on the arbi and thus getting a total return of 10%

Risk associated with this strategy:
• Lack of opportunities available in the market
• Risk of mispricing or improper valuation
• Inability of the derivatives to correlate perfectly with underlying security
• Execution risk, whereby the rates seen on the screen may not be the rates at which the ultimate execution takes place.

(b) Buying spot and selling future:
Where the stock of a company is trading in the spot market at Rs 1000 while the futures trades at Rs. 1020/- in the futures market then fund may buy the at spot and sell in the futures market thereby earning Rs. 20. In case of adequacy of cash with the fund, this strategy may be used to enhance returns Scheme which was otherwise sitting on cash.

Risk associated with this strategy:
• Lack of opportunities available in the market
• Risk of mispricing or improper valuation
Inability of the derivatives to correlate perfectly with underlying security
• Execution risk, whereby the rates seen on the screen may not be the rates at which the ultimate execution takes place.

(c) Buying stock future:
Where the scheme wants to initiate a long positon in a stock whose spot price is at say, Rs.1000 and futures is at Rs. 980, then the fund may just buy the f contract instead of the spot thereby benefiting from a lower cost.

Risk associated with this strategy:
• Lack of opportunities available in the market
• Risk of mispricing or improper valuation
• Inability of the derivatives to correlate perfectly with underlying security
• Execution risk, whereby the rates seen on the screen may not be the rates at which the ultimate execution takes place.

Options:
An option gives the owner the right but not the obligation to buy or sell the underlying asset at particular price and for a specified period of time. The will be exercised if the outcome is favourable to the owner. A call option gives the owner a right but not the obligation to buy the underlying asse predetermined price on a pre-specified date. A put option gives the owner the right but the not the obligation to sell a security at a predetermined price pre-specified date. For an option buyer, Risk is limited (or known) to premium paid on call or put options. . If options are sold, the risk is unlimit unknown). The risk of the unknown can be mitigated by staying covered, using covered calls or bull/bear spread, to name a few strategies.

Mainly there are two type of options; American and European. Options that can be exercised on or before the expiration date are called American Op while those that can be exercised only on the expiration date are called European Options. In India, till recently, Index options were European and options were American. However off-late, Exchanges have shifted options on individual stocks from American to European. Option contracts are desig by the type of option, name of the underlying, expiry month and the strike price. Thus options can be used to earn less volatile returns, earn the premi use for hedging purposes etc.

Strategies that use Options and the objectives of such strategies:

Illustrations of strategies using Options

a) **Call Option (Buy):** The fund buys a call option at the strike price of say Rs.1000 and pays a premium of say Rs. 50, the fund would earn profits if the market price of the stock at the time of expiry of the option is more than Rs. 1050 being the total of the strike price and the premium thereon. If on the date of expiry of the option the stock price is below Rs 1000, the fund will not exercise the option and it loses the premium of Rs 50. The maximum loss in such a strategy is limited to the option premium, while upside potential is theoretically unlimited

Risk associated with this strategy:

- Lack of opportunities available in the market
- Inability of the derivatives to correlate perfectly with underlying security
- Execution risk, whereby the rates seen on the screen may not be the rates at which the ultimate execution takes place.

b) **Put Option (Buy):** The fund buys a Put Option at Rs 1000 with the underlying security trading at Rs. 1000 by paying a premium of say Rs. 50. If the stock price goes down to Rs. 900, the fund would protect its downside and would only have to bear the premium of Rs 50 instead of a loss of Rs 100 whereas if the stock price moves up to say Rs.1100 the fund may let the Option expire and forego the premium thereby capturing Rs. 100 upside in the underlying security held by the Fund.

Risk associated with this strategy:

- Lack of opportunities available in the market
- Inability of the derivatives to correlate perfectly with underlying security
- Execution risk, whereby the rates seen on the screen may not be the rates at which the ultimate execution takes place.
- The above option positions can be initiated in both index based options as well as stock specific options.

Risk associated with this strategy:

- Lack of opportunities available in the market
- Inability of the derivatives to correlate perfectly with underlying security
- Execution risk, whereby the rates seen on the screen may not be the rates at which the ultimate execution takes place.

Any Notifications, Guidelines and circulars introduced by SEBI on derivatives from time to time shall automatically apply and forms part of t Scheme Information Documents

Portfolio Turnover

Portfolio turnover is defined as lesser of purchases and sales as a percentage of the average corpus of the Scheme during a specified period of time. Portfo turnover in the scheme will be a function of market opportunities. The scheme is open-ended scheme. It is expected that there would be a number subscriptions and repurchases on a daily basis. Consequently, it is difficult to estimate with any reasonable measure of accuracy, the likely turnover in t portfolio. The AMC will endeavor to optimize portfolio turnover to optimize risk adjusted return keeping in mind the cost associated with it. A hi portfolio turnover rate is not necessarily a drag on portfolio performance and may be representative of arbitrage opportunities that exist for securities he in the portfolio rather than an indication of change in AMC's view on a security etc. However, the AMC will take advantage of the opportunities th present themselves from time to time because of the inefficiencies in the securities markets.

Borrowing & Lending by the Fund

The Scheme may borrow monies to meet temporary liquidity requirements for the purpose of repurchase or redemption of Units or the payment of intere or IDCW to the Unit holders. However, such borrowing shall be restricted to 20% of the net assets of the Scheme and for a maximum period of six montl The limit of 20% may be revised by the Fund and to the extent the Regulations may permit. Provided the said limit, shall not be applicable for intrad borrowing subject to such conditions as may be specified by the board.

The Fund may raise such borrowings, secured or unsecured, from any person or entity as it may deem fit, including Sponsor or Shareholders of any of th associate / group / affiliate entities or banks, after approval by the Trustee, at market related rates.

<table>
<tr><td></td><td>Stock Lending by the Fund

Stock Lending involves lending of securities to another person or entity for a fixed period of time, at a negotiated compensation in order to enhance retur of the portfolio. The Trustee may permit the Fund to engage in Stock Lending only if permitted under and in line with the prevailing securities lendi Regulations. The Fund can temporarily lend, through an approved intermediary, securities held by the Scheme to reputed counterparties, for a fee, subje to internal norms, if any. This would enable generating better returns on those securities, which are otherwise bought with the intention of holding the sar for a longer period of time. The securities lent will be returned by the borrower on the expiry of the stipulated period or the lender can call the same ba before its expiry.

The AMC will follow regulatory restrictions as may be prescribed in carrying on the activities of Stock lending. Such lent stock, while they are on-lendir will not be available for sale, and this can result in temporary illiquidity.

The Fund Manager may engage in Stock Lending as per following limits:
more than 20% of the net assets of the Scheme can generally be deployed in Stock Lending.
more than 5% of the net assets of the Scheme can generally be deployed in Stock Lending to any single counter party.</td></tr>

INSTRUCTIONS TO HELP YOU COMPLETE THE MAIN APPLICATION FORM

All investors (individual and non- individual) are required for KYC compliance. However, applicants should note that minors cannot apply for KYC compliance and any investment in the Name of minors should be through a Guardian, who should be KYC compliant for the purpose of investing with a Mutual Fund. Also applicants/ unit holders intending, to apply for units/ currently holding units and operating their Mutual Fund folios through a Power of Attorney (PoA) must ensure that the issue of PoA and the holder of the PoA must mention their KYC compliance status at the time of investment. PoA holders are not permitted to apply for KYC compliance on behalf of the issuer of the PoA, Separate procedures are prescribed for change in name, address, and other KYC related details, should the applicant desire to change such information, POS will extend the services of effecting such changes. In line with the SEBI circular No. MIRSD/Cir-5/2012 dated April 13, 2012 and various other guidelines issued by SEBI on the procedural matters for KYC Compliances, the Investors are requested to note the following additional provisions shall be applicable for "KYC Compliances" with effect from December 1, 2012:

1) In case of an existing investor of GMF and who is already KYC Compliant under the erstwhile centralized KYC with CVL (CVLMF) then there will be no effect on subsequent Purchase/ Additional Purchase (or ongoing SIPs/STPs,etc) in the existing folios/accounts which are KYC compliant. Existing Folio holder can also open a new folio with Groww Mutual Fund with the erstwhile centralized KYC

2) In case of an existing investor of Groww Mutual Fund and who is not KYC Compliant as per our records, the investor will have to submit the standard KYC Application forms available in the website www.cvlkra.com along with supporting documents at any of the SEBI registered intermediaries at the time of purchase / additional purchase / new registration of SIP/STP etc. In Person Verification (IPV) will be mandatory at the time of KYC Submission. This uniform KYC submission would a onetime submission of documentation.

3) Investors who have complied with KYC process before December 31, 2011 (KYC status with CVL KRA as "MF - VERIFIED BY CVLMF") and not invested in the schemes of Groww Mutual Fund i.e not opened a folio earlier, and wishes to invest on or after December 01, 2012, such investors will be required to submit 'missing/not available' KYC information and complete the IPV requirements.

Updation of 'missing / not available' KYC information along with IPV is currently a one-time requirment and needs to be completed with any one of the mutual funds i.e. need not be done with all the mutual funds where investors have existing investments. Once the same is done then the KYC status at CVL KRA will change to 'Verified by CVL KRA' after due verification. In such a scenario, where the KYC status changes to 'Verified by CVL KRA', investors need not submit the 'missing/not available' KYC information to mutual funds again.

Individual Investors are required to submit 'KYC Details Change Form' issued by CVL-KRA available on their website www.cvlkra.com.

In case of Non Individual investors, complied with KYC process before December 31, 2011, KYC needs to be done afresh due to significant and major changes in KYC requirements.

Investors needs to provide the complete details in the KYC application form along with the required documents (for individual investors or non-individual investors as appropriate). III. BANK DETAILS:

1. As per the SEBI guidelines, it is mandatory for investors to mention their bank account details in the application form. In the absence of the bank details the application form will be rejected.

2. Purchase Application requests should necessarily mention the pay-in bank account details i.e bank name, bank account number, bank branch used for issuing the payments to the fund. The first unit holder has to ensure that the subscription payment has to be made through his own bank account or through any of the bank account wherein he is one of the joint bank account holder. If this is not evidenced on the payment cheque/funds transfer/RTGS/NEFT request, demand draft etc given by the investor at the time of subscription then unit holder should attach necessary supporting documents as required by the fund like bank certificate, bank passbook copy, bank statement etc to prove that the funds are from a bank account held by the first unit holder only. If the documents are not submitted with the application the fund reserves the right to reject the application or call for additional details. In specific exceptional situations where Third Party payment is permitted like i.e (i) Payment by employer on behalf of employee under Systematic Investment Plan (SIP) facility, or lump sum / one time subscription, through payroll deductions or deductions of expense reimbursements (ii) Payment by Corporate to its Agent/Distributor/Dealer (similar arrangement with principal-agent relationship), on account of commission/incentive payable for sale of its goods services, in the form of the Mutual Fund Units through Systematic Investment Plans or lump sum / one-time subscription (iii) Custodian on behalf of an FPI or a client.

For the above mentioned cases KYC of the investor and the KYC of the person making the payment is mandatory irrespective of the amount. If the electronic credit is delayed or not affected or credited to a wrong account, on account of incomplete or incorrect information, GMF will not be held responsible. Default bank account will be used for all IDCW and redemption payouts unless investor specifies one of the existing registered bank account in the redemption request for receiving redemption proceeds. A new non – registered bank account specified in the redemption request for receiving redemption proceeds will not be considered and the redemption proceeds will by default be credited into the default Bank account. The investor will have to initially get the non registered bank account registered in the folio and then apply for the redemption request. Also if no registered bank account is mentioned at the time of redemption then by default the redemption proceeds will be credited into the default Bank account.

5. In accordance with the AMFI Best Practice Guideline Circular No. 17/2010-11 dated October 22, 2010 and Circular No. 39/ 2013-14 dated August 23, 2013 and to reduce operational risk, Investor(s) are requested to note that any one of the following documents shall be required to submit as a proof of Bank Account Details (for Redemption/IDCW), in case the cheque provided along with fresh subscription/new folio creation does not belong to the Bank Account Details specified in the application form for redemption / IDCW payments w.e.f. In case of investments made in the name of a minor through a guardian by means of Cheque, Demand Draft or any other mode, the payment shall be accepted from the bank account of the minor / minor with guardian or from a joint account of the minor with the guardian only.
